DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Amendment to Specification:

Page 1, line 3 insert:

This application is a divisional of 09/633,556 now US Patent 6,660,657 dated 08/07/2000.

DETAILED ACTION

Claims 29-40 are allowed.

The following is an examiner's statement of reasons for allowance: Applicant's IDS submits previously unconsidered art Holloway 6040249- it should be noted that the Holloway reference is similar art to that of claim 29- however Holloway teaches that the annealing performed occurs during nitrogen ion exposure which assists in confining the nitrogen to only the upper half (or third). In contrast the recited claims teach forming the nitrogen within the gate oxide and subsequently annealing the gate oxide and through this post anneal the nitrogen remains confined. In other words the claim should be considered sequentially. Therefore the Holloway reference does not anticipate the language of claim 29 and claim 29 is deemed allowable over prior art. Consequently claims 30-40 are also in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
